HOME DELIVERIES

All expecting mothers are to have arrangements made with a doctor for delivering their babies.

No Sea Org member is to deliver a baby without a Legal Midwife license with the State of California. Unless of course the doctor has been notified and arrives a bit late to a home delivery. This is strictly emergency.

This is in effect to protect the Church in the case of any unhandled complications that might come up, resulting in damage to the child or mother, during the delivery.

It is the MO's duty, to ensure all expecting mothers do have a doctor for their deliveries.
