Success Stories

Purification Rundown®:

"I have finished the Purification Rundown! I feel really great and free. I feel cleaner than ever on the inside and outside. This feeling is amazing! I feel that the negative side of me has just disappeared and has been replaced with a new positive side. I, the spirit, feel good and no drugs can ever stand in my way. I feel so much happier and brighter as a being. I AM ME!" —K.M., 11 yrs.

Objective Auditing:

"OH MY GOD! Today I had a blowout session with such big realizations that my mouth couldn't keep up with my thoughts. Most of my biggest realizations are listed below:

"I can have affinity with whatever I want and I can not have affinity with whatever I want.

"I can agree that something is real or disagree and it is only real to me if I believe so.

"I can communicate or not communicate with whatever I want.

"I can have anything that I want in my space and I have control over my space.

"THE GREATEST ONE: If I have intention with FULL cause and responsibility, then there is no counter intention strong enough to go against it.

"These realizations along with many others add up to ummmm..... WOW!!!!!! The objectives are great things, long but amazing. I felt very different at the end of the session and I felt calm. Being in present time is GREAT! Thanks LRH!" —S.T., 12 yrs.

The Happiness Rundown®:

"I am so happy I don't think that there is a word for how happy and up tone I truly am! On every session I would realize something new and look at everything in a different way. I really loved this rundown!!!! I will use EVERYTHING that I learned on it and I plan to be on the Way to Happiness for the rest of my life!!!! It is so incredible what a session can do to me!" —C.V., 14 yrs.

Ethics:

"I had a lot of fun. I'm so happy I was able to let out my overts. It helped me realize many things. I feel really happy right now and I feel as if my whole body is jumpy with excitement. I'm glad I did this." —S.B.

The Thinking Book Course:

"While I was doing this course I started to recognize outpoints and plus points and could see what was logical. It was a great feeling. I now realize when I'm being reasonable and since doing this course I know that I can fix it. 'The Thinking Book Course' was great and I totally enjoyed doing this course."
